MEDIA RELEASE

LABIDCO and UTT Sign Project Agreement for GHG Inventory of the Port of Brighton

On Thursday 09 February 2023, La Brea Industrial Development Company Limited (LABIDCO) and The University of Trinidad and Tobago (UTT), signed a Project Agreement to conduct a Greenhouse Gas Model and Inventory of the Port of Brighton, which is LABIDCO's maritime asset located in La Brea.

This Project Agreement follows the Memorandum of Understanding signed in 2020 between The NGC Group and UTT for a Climate Change Mitigation Project, in recognition of the impact of GHG emissions on climate change.

The inventory will account for the three Greenhouse Gases focused on by the Intergovernmental Panel on Climate Change (IPCC) Guidelines for emissions from energy activities for national inventories. These are:

- Carbon Dioxide (CO₂)
- Methane (CH₄), and
- Nitrous Oxide (N₂O)

The scope of the inventory includes:

- identification and documentation of both on-shore and off-shore energy consumers in LABIDCO's operations
- development of a GHG emission inventory for shipping activity and energy used from LABIDCO's marine assets, and,
- compilation of a GHG Emission Inventory of LABIDCO's maritime assets associated with the operations

The signing of this agreement demonstrates LABIDCO'S commitment to sustainability and environmental awareness and is aligned to its strategic plan to become a Green and Smart Port.

Participating in today's signing were:

- Dr. Donnie Boodlal, Deputy Chairman – LABIDCO
- Wendy Seow, General Manager – LABIDCO
- Professor Prakash Persad, President – UTT
- Professor Festus Addo-Yobo, Vice President, Research, Academic and Student Affairs - UTT
- Dr Rean Maharaj, Associate Professor – UTT
